

August 2017

Dear Sjögren's Patient:

Each day research and clinical trials are being conducted to unveil new medications, therapies and diagnostic tools for Sjögren's syndrome and its symptoms. Listed below is information about a Sjögren's and Dry Eye clinical research study being held in the Rancho Cordova area. Your participation in this study could help patients worldwide and I hope you will consider learning more.

This new Sjögren's and Dry Eye study is looking for patients with a confirmed diagnosis of Primary Sjögren's and who have dry eye symptoms requiring the use of lubricating drops. Eligible patients should be 18 years of age or older, have no other eye diseases and take no eye drops other than lubricants. This new drop is replacing a protein, Lacritin, that is naturally occurring in normal patients but found to be largely absent in Sjögren's patients. There is no cost to you to participate. Please visit <https://www.facebook.com/LacritinAndDryEye/> for more information.

For more information and to see if you may be eligible to participate, contact:

Dr. Joseph Martel
Martel Eye Medical Group
11216 Trinity River Drive
Rancho Cordova, CA 95670
Contact Diana at diana.marteleye@gmail.com

To find out if you qualify or for further information, call (916) 631-7860

If you have questions regarding the project, please contact the number listed above and not the Foundation Office. On behalf of the millions of Sjögren's sufferers in this country, I thank you for taking time to learn more about this study.

Sincerely,

A handwritten signature in black ink that reads 'Steven Taylor'.

Steven Taylor
Chief Executive Officer
